Coverage of Statistics—

The particulars given in Divisions 2 to 5 of this Part are confined to operations on rural holdings of one acre or more used for commercial production of livestock and/or crops. Commercial poultry farming and commercial bee-keeping are included, however, even though the holding may be less than the stipulated one acre. Livestock kept on reserves &c. by owners who occupy no holding are also included.

Period Covered—

Data relating to areas sown and production are in general for crops harvested during twelve months ended 31st March. Owing to seasonal differences, however, some variations have been made to this general rule. The actual period covered by the 1964-65 figures is shown for each crop in Table 18 on page 21.

Australian Decimal Currency

(Dollars($)/Cent(c) System)

On 14th February, 1966, under the *Currency Act* 1965, a dollar/cent decimal currency system, with one dollar equal to 100 cents, was introduced in Australia.

The relationship between pounds, shillings and pence, and dollars and cents, as prescribed in the Act, is as follows:—

1 pound = 2 dollars
1 shilling = 10 cents
1 penny = 5/6ths of a cent

In this publication monetary amounts have been converted to the equivalent amounts in the new system.
